DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group I drawn to a low gluten wafer in the reply filed on October 25, 2006 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear how the wafer as it exists can contain water at the recited temperature.

The recited method steps render the claimed invention indefinite, which is directed to the low-gluten wafer product. Note that claims do not indicate that the wafer needs to be "made by method steps".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1761

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States:

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Wernecke (DE 1927394).

Wernecke discloses a bread mix for low-protein diets. Wernecke also discloses a low gluten bread product that contains maximum 0.3% by weight gluten (Abstract). Wernecke also discloses the bread product comprising wheat starch, pregelatinized wheat starch and water (Abstract). Wernecke discloses that low-gluten bread product is designed for people suffering from Celiac disease (Translation p.1). Wernecke discloses that pregelatinized wheat starch serves as a structure improving component (Translation p.3). Wernecke also discloses baking temperature of 400F (Translation p.5).

Because the reference discloses same ingredients made by a similar method, it appears that the reference anticipates the claimed invention absent any clear and convincing arguments and/or evidence to the contrary.
